

THINMANAGER Hands-On 2-Day Customer Training

Learn how to create, configure, deploy, and manage a ThinManager thin client system.

Dates still available, but hurry they won't last long!

Each trainee has their own server laptop and dual monitor thin client

Get trained in our new state-of-the-art thin client education facility decked out with MultiMonitor workstations, IP cameras, virtual machines, terminal servers and more!

ThinManager Training is a hands-on technical course. It will cover the details of creating, configuring, deploying, and managing a ThinManager thin client system. This is ideal for people who will be deploying or managing the thin clients and need to improve their skill level.

This two-day class schedule has been divided into two sections that cover the expanding features of ThinManager 6.

TRAINING SUMMARY

This class will cover the following topics:

ThinManager 6.0 Basic Technical Training

- ThinManager Functions
- ThinManager Installation
- ThinManager Licensing
- Terminal Configuration
- Adding Terminals
- Display Clients
- Failover versus Redundancy
- Terminal Groups and Modules
- Multiple Monitors
- Packages
- Reports and Schedules
- Shadowing in ThinManager
- ThinManager Server Configuration Wizard
- ThinManager Security Groups
- WinTMC Configuration in ThinManager

ThinManager 6.0 Advanced Technical Training

- IP Cameras
- ThinManager TermSecure
- Permissions
- ProxCard Reader & HID Badge Configuration
- Microsoft Terminal Services
- Virtualization
- PXE Boot
- ThinManager Mobile Apps
- Screentronix
