

MULTIMONITOR

Customize every screen to display your content in any layout you wish.

Drive up to seven 4K monitors from a single thin client. Assign multiple applications and virtual screens to every monitor to ensure everything in your plant stays in view.

* Appropriate hardware required. VersaView 5200 Multi 4K display from Allen-Bradley picture above.

BETTER VIEWS, BETTER INSIGHTS, BETTER OUTCOMES

ThinManager's MultiMonitor feature allows users to display up to seven monitors on a single thin client*. MultiMonitor can be used to span sessions across monitors and/or run individual or multiple sessions on each monitor. Touchscreens are also supported.

The latest update to MultiMonitor completely recreates the configuration wizard for deploying multiple monitors with ThinManager. Now you can simply drag and drop your monitor arrangements to easily customize your plant floor view in minutes.

MultiMonitor supports spanned resolutions up to 8192 x 8192 with 64K colors for MS Server 2012 and newer. MS Server 2008 and prior are limited to a spanned resolution of 4096 x 2048.
