ThinManager Configuration Product Training (CPT) Roadshow 2027

ThinManager Cloud-based Training format ***replaces*** the MR Demo format

Tuesday and Wednesday live training at your facility!

ThinManager Roadshows follow a cloud-based training format.

Benefits of cloud-based training format:

- Still **in-person training**, but much **less equipment** to manage.
- More seats means up to **20 people per training**—60% more capacity.
- Cloud-based training format uses the **same ThinManager lab material** as the previous MR Demo format.

ThinManager CPT Training Roadshow Detailed Agenda

Section 1: Defining ThinManager Display Servers, Display Clients and Terminals

Section 2: Configuring ThinManager Application Link and Failover for FactoryTalk View SE

Section 3: Terminal Replacement in under 2 Minutes

Section 4: Deploying Additional Content Using MultiSession, Tiling, Virtual Screens, and Multiple Monitors

Section 5: Docker Containers

Section 6: User Based Content Delivery

Section 7: Event Based Content Delivery and ThinManager Logix PinPoint

Section 8: Location Based Content Delivery

Section 9: ThinManager Redundancy and Firewall Configuration

Section10: Securing the ThinManager Admin Console

Section 11: Firmware Packages and Modules

Section 12: Language Support

Section 13: Terminal Groups, Overrides, Schedules and Mouse Button Mapping

Section 14: PXE Server, Virtual Thin Clients, and Wireshark

Section 15: TermMon ActiveX and REST API

Section 16: Geo-Fencing with Location Services

Now including FactoryTalk Optix deployment with ThinManager!

FT Optix

- How to Deploy Optix with Remote Desktop Services (covered in Section 4)
- How to Deploy Optix with a Chrome Docker Container (covered in Section 5)
- How to Leverage ThinManager's REST-API with Optix (covered in Section 15)
- How to Deploy ThinManager Logix PinPoint with Optix (covered in Section 15)

Materials Needed for a Successful ThinManager CPT Training

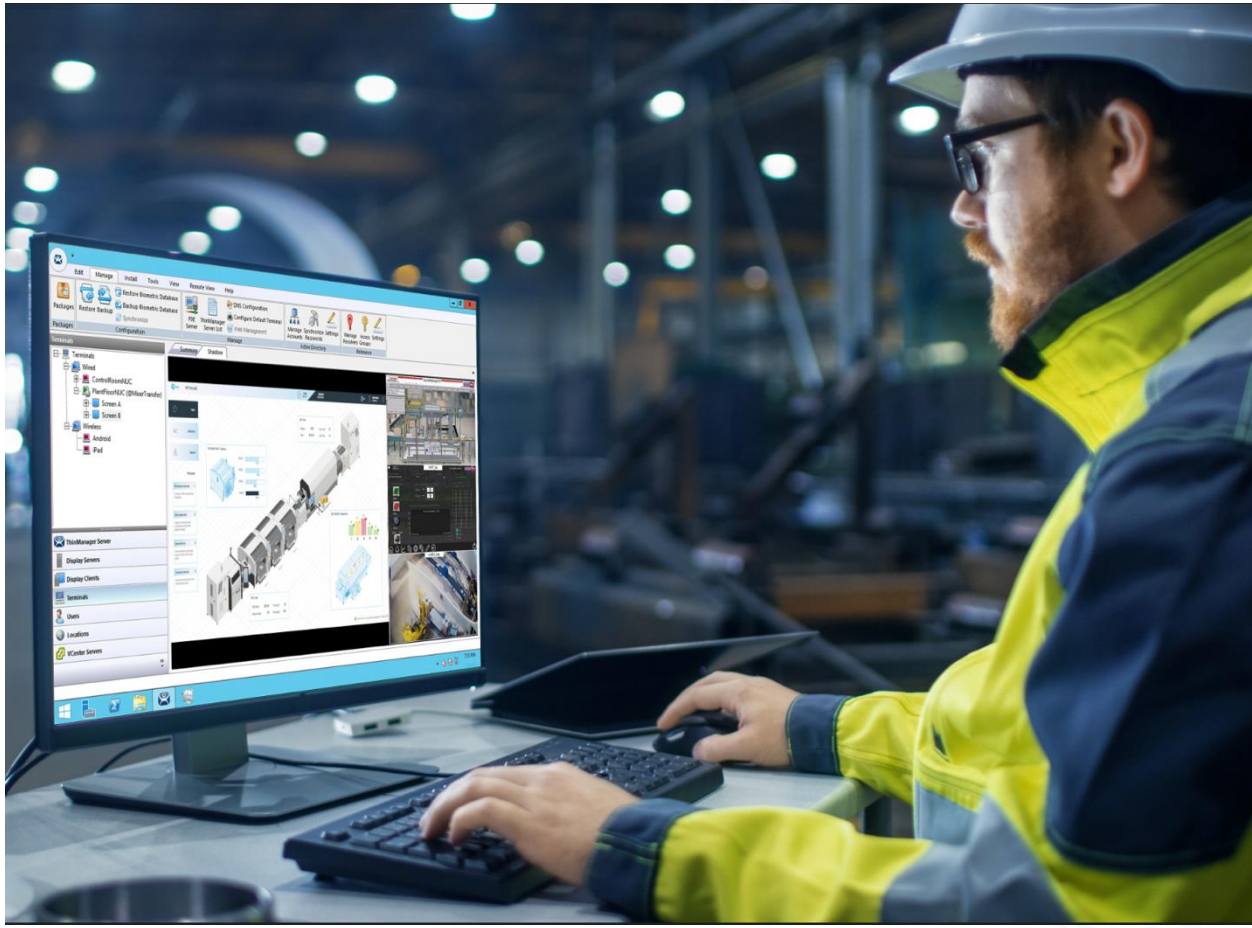

What registrants need to bring, what distributors need to provide, etc.

Here are **items every registrant will need to bring/prepare** for the training:

- A laptop.
- A smart phone or tablet for use in the lab mobility section.
- A Chrome Browser.
- Disconnect from VPN.

It is recommended to have 2 monitors to efficiently navigate through the ThinManager labs (one for the lab manual, one for the lab station). Registrants have one monitor on their laptops. **Distributor partners should provide a secondary monitor for each registrant as well as the following items:**

- Adequate training table space for attendees to have a laptop, monitor and mobile device.
- A secondary monitor for each trainee to view lab manual.
- Large TV/Screen for presentation.
- Suitable conference room speaker for supporting engineer.

ThinManager Certification Benefits

System Integrators and OEMs can become ThinManager Certified Partners

ThinManager Certified Partners receive the following benefits:

- Access to an internal lab license (Redundant 10-pack for 1 year)
- Access to project licenses (Redundant 10-Pack for 90 days per project)
- Project & lab licenses include Software Maintenance which includes free version upgrades & tech support
- Technical support for a customer that is current on Software Maintenance
- Searchable listing on ThinManager website
- ThinManager Partner badge to display on your website

System Integrators and OEMs who complete the required labs become ThinManager Certified Partners, receive training certificates, can request lab licenses and an optional listing on partners.thinmanager.com.

End Users who complete the required labs will only receive a training certificate.
