Terminal-to-Terminal Shadowing

Use the F1 button on any page of a ThinManager wizard to launch Help for that page. Visit www.thinmanager.com/TechNotes/Intro/Manuals.shtml to download the full Manual or the ThinManual.

Terminal-to-Terminal shadowing is made possible with Terminal Shadow application groups. A Terminal Shadow application groups allow a terminal to shadow another terminal without needed to run the ThinManager interface or to be logged in as an administrator. This Shadow Group can contain a specific terminal or several terminals.

**Terminal Shadow Application Group**

The Application Group Wizard can be launched by selecting Manage > Application Group List from the menu or by right clicking on the Application Group branch and choosing the Add Application Group command.

Configure the Terminal Shadow Application Group by selecting Terminal Shadow from the Type of Application Group drop-down after naming the group.

Select the Next button to continue.
Terminal Shadow Configuration

The Terminal Shadow Application Group page allows the selection of the terminal or terminals to be shadowed.

By default the Shadow Group is configured to allow all terminals to be shadowed. Unselecting the *All Terminals Available* checkbox will allow the designation of specific terminals.
Select the **Add** button to launch the terminal selection window.
Select a terminal for shadowing by highlighting it in the **Select Terminal or Group** window and selecting the **OK** button. The window will close after each selection.

To add multiple terminals repeat the process by selecting the **Add** button on the **Terminal Shadow Application Group** page.
The Terminals to Shadow textbox will display the terminals added to the list.
**Shadow Selection Screen**

When a terminal launches a Shadow Application Group that has multiple members a *Select Terminal to Shadow* window will be displayed to allow the selection of the terminal to shadow.
