ACP ThinManager supports two client/server communication protocols, the Microsoft© RDP and the Citrix ICA. Terminals and Display Clients can be configured to use one or the other with a simple radio button.

**Terminals Using Display Clients with ICA**

If a terminal is using the display clients to receive applications then Terminal Services Display Clients can be configured to use the ICA protocol. These display clients will show up in the Available Display Clients list on the Display Client Selection Page.

![Terminal Configuration Wizard](image)

**Display Client Selection**
Select the Display Clients to use on this terminal

- **Available Display Clients**
- **Selected Display Clients**

- Graphics
- HMI
- Reports
- BackCamera01

- ICAApp1
- ICAApp2
- FrontCamera01

- **Edit Display Clients**
- **Override**
Select the desired Display Clients from the Available Display Clients list and move them to the Selected Display Clients list. The terminal will use the Display Clients selected, both RDP and ICA.

Display Client Configuration Wizard

A Display Client can be configured to use the ICA protocol on the Terminal Services Display Client Type page of the Display Client Configuration Wizard.

**Importance of Page:** Configures the Display Client to use the Citrix ICA Protocol

**Settings:**
- **Citrix ICA Servers** – This allows the Display Client to use the Citrix ICA as its protocol.
- **Citrix Device Services Servers** – This allows the Display Client to use archaic Device Services Servers.
- **Remote Desktop Protocol Servers** – This uses the default Microsoft © RDP as its protocol.

**Why Change from Default Settings:** You need to select the **Citrix ICA Servers** to use the ICA protocol. Select **Next** to continue.
**Citrix ICA Page**

![Citrix ICA Page](image)

**Importance of Page:** Configures the Citrix Settings

**Settings:**
- **Encryption Level** – This drop-down sets the Citrix encryption level.

**Fields:**
- **ICA Browser Address** – Entering the ICA browser address aids in connection across routers, subnets, and domains.
- **Enter the name of a Published Application** - This field allows the desired published application to be designated when the **Use a Citrix Published Application** checkbox is selected.

**Checkbox:**
- **Use a Citrix Published Application** – This checkbox, if selected, will allow usage of Citrix Published Applications to deploy programs to the thin client.

**Why Change from Default Settings:** Check the **Use a Citrix Published Application** checkbox and enter the published application in the **Enter the name of a Published Application** field to use an ICA published app..

This finishes the wizard, graying out the **Next** button and activating the **Finish** button.
**Note:** Published Application should have a continuous name and not contain spaces.

If the Display Client is using a Citrix Published Application the wizard will finish with this page.
If the Display Client is not using Citrix Published Application the wizard will continue to allow the selection of Terminal Servers that are configured to use the ICA protocol. See the Terminal Server Capabilities Page for details.

**Terminal Using Citrix and Individual Terminal Servers**

The **Terminal Connection Type** page of the **Terminal Configuration Wizard** allows the selection of the desired Client Communication Protocol on terminals is using the legacy “Individual Terminal Servers” instead of the preferred Display Client method.

Select the **Citrix ICA** radio button to use the ICA protocol.

Once the **Citrix ICA** protocol is selected the wizard will display the **Citrix ICA Configuration** page.
Citrix ICA Configuration Page

***Importance of Page***: Sets the ICA encryption Level and enables use of Published Applications.

**Fields:**

*Encryption* - The Encryption drop-down box sets the level of Citrix encryption.

**Buttons:**

- *Are you using Published Applications* – This allows the usage of Citrix Published Applications for deploying programs.

***Why Change from Default Settings***: Citrix ICA has a feature called Published Applications. If you are using Published Applications, select the **Yes** radio button, then select the **Next** button to continue to the Citrix Published Application dialog.

If you are not using Published Applications, select the **No** radio button, then select the **Next** button to continue to the Terminal Server Selection page.
**Citrix Published Applications Page**

**Importance of Page:** Defines what Citrix published application to have the terminal

**Fields:**
- **Published Application Name** – Enter the name of the desired published app you wish to run.
- **ICA Browser** – Enter the ICA master browser name, if needed.

**Why Change from Default Settings:** Allows use of a published application.

Enter the name of the desired Published Applications in the **Published Applications Name** field. Do not use spaces in the name when creating a Published Application for Terminal Services.

Citrix uses ICA Browsers as part of the system. Because the ICA client may have problems detecting an ICA browser across a router or switch, an **ICA Browser** field is provided for entering the name of an ICA browser.

Select the **Finish** button to create the Terminal, or select the **Next** button to rejoin the main configuration path to configure more options.

Terminals using the **Select Individual Terminal Servers** will be shown the Terminal Server Selection page where the desired terminal servers can be selected.
