Scheduling

ThinManager allows tasks to be automated with the Schedule function. This applies to Terminals, Terminal Groups, Terminal Servers, TermSecure Users, and the ThinManager Server.

Terminal Schedule

Selecting the **Schedule** button on the **Terminal Options** page will launch the **Event Schedule** window and allow a schedule to be created for terminal events.
Check the **Set Schedule** checkbox and select the **Schedule** button to launch the **Event Schedule** window.

**Note:** The Schedule for Terminal Groups is the same as for individual terminals. It has an advantage of applying the scheduled events to a whole group of terminals instead of requiring a configuration for each event on each terminal.
The Event Schedule will list events for the terminal or group. It has four buttons:

- The **Add** button will launch a Schedule window to allow an event to be configured.
- The **Edit** button will allow a highlighted event to be changed.
- The **Delete** button will remove a highlighted event.
- The **OK** button will accept changes and close the Event Schedule window.

Events can be added by selecting the **Add** button to launch the Schedule window.
The *Schedule* window has several configuration settings.

**Event Type** is a drop-down box that allows event selection:

- **Disable Terminal** - This will prevent a terminal from being used, although its terminal server sessions will still be running on the terminal servers.
- **Enable Terminal** - This will allow a disabled terminal to become active again.
- **Reboot Terminal** - This will cycle power on the terminal and reload its configuration.
- **Reset Terminal Sessions** - This will logoff the sessions that the terminal has open on terminal servers.

The **Repeat Interval** radio buttons allow the event in the **Event Type** drop-down to be run **Once Only**, **Weekly/Daily**, **Monthly**, or **Yearly**.

- Selecting **Once Only** will show a **Select Date** field for the event.
- Selecting **Weekly/Daily** will show a **Weekly Schedule** list for the event to run. The **Every Day** button will select all the days in the list.
- Selecting **Monthly** will show a **Select Day of Month** field for the event.
- Selecting **Yearly** will show a **Select Date** field for the event.

The **Time** field allows the selection of the time that the event should occur.

Select the **OK** button to close the **Schedule** window.

Select **Add** to add another event to the **Event Schedule** or select **OK** to close the **Event Schedule** window and return to the terminal configuration.
Terminal Server Schedule

The Terminal Server Name page of the Terminal Server Wizard has a Schedule button to configure a schedule for terminal server events.

Select the Schedule button on the Terminal Server Name page of the Terminal Server Wizard to launch the Event Schedule window.
The **Event Schedule** will list events for the terminal or group. It has four buttons.

- The **Add** button will launch a **Schedule** window to allow an event to be configured.
- The **Edit** button will allow a highlighted event to be changed.
- The **Delete** button will remove a highlighted event.
- The **OK** button will accept changes and close the **Event Schedule** window.

Events can be added by selecting the **Add** button to launch the **Schedule** window.
The **Schedule** window has several configuration settings.

**Event Type** is a drop-down box that allows event selection:

- **Disable Terminal Server** - This will disconnect all the ThinManager Ready thin clients connected to the terminal server. The sessions will remain idle on the terminal server unless they are set to disconnect in the Terminal Services Configuration console. See Disable Terminal Server for details.

- **Enable Terminal Server** - This will allow a disabled terminal server to accept ThinManager Ready thin client connections again.

- **Reboot Terminal Server** - This will cycle power on the terminal server and restart it.

The **Repeat Interval** radio buttons allow the event in the **Event Type** drop-down to be run **Once Only**, **Weekly/Daily**, **Monthly**, or **Yearly**.

- Selecting **Once Only** will show a **Select Date** field for the event.

- Selecting **Weekly/Daily** will show a **Weekly Schedule** list for the event to run. The **Every Day** button will select all the days in the list.

- Selecting **Monthly** will show a **Select Day of Month** field for the event.

- Selecting **Yearly** will show a **Select Date** field for the event.

The **Time** field allows the selection of the time that the event should occur.

Select the **OK** button to close the **Schedule** window.

Select **Add** to add another event to the **Event Schedule** or select **OK** to close the **Event Schedule** window and return to the terminal server configuration.
ThinManager Server Schedule

The ThinManager Server Configuration Wizard has a System Schedule page that allows the Scheduler to be launched. This allows tasks to be scheduled for the ThinManager Server.

System Schedule

Select the **Edit Schedule** button to launch the **Event Schedule** window.
The Event Schedule window allows events to be scheduled by selecting the Add button when system is displayed in the Select Event Category drop-down box.
The Schedule dialog allows events to be scheduled for the ThinManager. The two main events are Run Report and Backup Configuration Database.

Select the desired event in the Event Type drop-down.

If Run Report is chosen, select the desired report in the Report Template File drop-down.

If Backup Configuration Database is chosen the backup file will be automatically chosen if the Auto Generate Filename checkbox is selected. To use a different filename, uncheck the Auto Generate Filename checkbox and enter the desired name in the Report Output Filename. A Browse button will appear to allow selection of the file.

The Repeat Interval radio buttons control the frequency of the event. The time selection varies with the Repeat Interval chosen.
Select the appropriate time for the event and select **OK** to accept the configuration and **Cancel** to cancel the changes.

While the **Event Schedule** window is open, other scheduled events can be viewed by selecting the event type in the **Select Events Category** drop-down. The event categories are **system** (ThinManager Server), **terminal** (Terminals), **terminalserver** (Terminal Servers) and **user** (TermSecure Users).
Events Schedule

New events cannot be added for the non-system categories, but existing events can be changed by highlighting an event and selecting the **Edit** button. Events can be deleted by selecting the **Delete** button. The **OK** button accepts the changes and closes the window.

**TermSecure User Schedule**

TermSecure Users and TermSecure User Groups have a schedule on the **User Options** page of the TermSecure User Configuration Wizard.
Check the **Set Schedule** checkbox and select the **Schedule** button to launch the **Event Schedule** window.

**Note:** The Schedule for TermSecure User Groups is the same as for individual TermSecure Users. It has an advantage of applying the scheduled events to a whole group of users instead of requiring a configuration for each event on each user.
The Event Schedule will list events for the TermSecure User or TermSecure User group. It has four buttons:

- The **Add** button will launch a **Schedule** window to allow an event to be configured.
- The **Edit** button will allow a highlighted event to be changed.
- The **Delete** button will remove a highlighted event.
- The **OK** button will accept changes and close the **Event Schedule** window.

Events can be added by selecting the **Add** button to launch the **Schedule** window.
The Schedule window has several configuration settings.

**Event Type** is a drop-down box that allows event selection:

- **Disable User** - This will prevent a user from logging in through TermSecure or will disconnect and existing session.
- **Enable User** - This will allow a user to become active again.

The **Repeat Interval** radio buttons allow the event in the **Event Type** drop-down to be run **Once Only**, **Weekly/Daily**, **Monthly**, or **Yearly**.

- Selecting **Once Only** will show a **Select Date** field for the event.
- Selecting **Weekly/Daily** will show a **Weekly Schedule** list for the event to run. The **Every Day** button will select all the days in the list.
- Selecting **Monthly** will show a **Select Day of Month** field for the event.
- Selecting **Yearly** will show a **Select Date** field for the event.

The **Time** field allows the selection of the time that the event should occur.

Select the **OK** button to close the Schedule window.

Select **Add** to add another event to the Event Schedule or select **OK** to close the Event Schedule window and return to the terminal configuration.
