Terminal-to-Terminal Shadowing

Use the F1 button on any page of a ThinManager wizard to launch Help for that page.

Terminal-to-Terminal shadowing is made possible with Terminal Shadow Display Clients. A Terminal Shadow Display Client allows a terminal to shadow another terminal without needed to run the ThinManager interface or to be logged in as an administrator. This Shadow Group can contain a specific terminal or several terminals.

**Terminal Shadow Application Group**

The Display Client Wizard can be launched by right clicking on the Display Client branch and selecting Add Display Client or by right clicking on the Terminal Shadow branch and selecting Add Display Client.

Configure the Terminal Shadow Application Group by selecting Terminal Shadow from the Type of Display Client drop-down after naming the group.
Select the **Next** button to continue.

**Terminal Shadow Configuration**

The **Terminal Shadow Display Client** page allows the selection of the terminal or terminals to be shadowed.

By default the Shadow Group is configured to allow all terminals to be shadowed.
**Shadow Selection Screen**

When a terminal launches a Shadow Application Group that has multiple members a **Select Terminal to Shadow** window will be displayed to allow the selection of the terminal to shadow.

![Select Terminal to Shadow window](image)

**Terminal Selector**

Highlight the desired terminal and select the **OK** button.
Specific Terminal Shadow

Unselecting the **All Terminals Available** checkbox will allow the designation of specific terminals.

Select the **Add** button to launch the *Select Terminal or Group* window.
Select a terminal for shadowing by highlighting it in the **Select Terminal or Group** window and selecting the **OK** button. The window will close after each selection.

To add multiple terminals repeat the process by selecting the **Add** button on the **Terminal Shadow Application Group page**.
The Terminals to Shadow textbox will display the terminals added to the list.

If only one terminal is displayed in the Terminal to Shadow window then that terminal’s shadow will be shown when the Display Client is launched.

If multiple terminals are displayed in the Terminal to shadow window then the **Select Terminal to Shadow** window will be displayed to allow the selection of the terminal to shadow.
