Terminal Schedules

Use the F1 button on any page of a ThinManager wizard to launch Help for that page.

Selecting the Schedule button on the Terminal Options page will launch the Event Schedule window and allow a schedule to be created for terminal events.

![Terminal Configuration Wizard](image)

Check the Set Schedule checkbox and select the Schedule button to launch the Event Schedule window.

**Note:** The Schedule for Terminal Groups is the same as for individual terminals. It has an advantage of applying the scheduled events to a whole group of terminals instead of requiring a configuration for each event on each terminal.
The Event Schedule will list events for the terminal or group. It has four buttons:

- The **Add** button will launch a Schedule window to allow an event to be configured.
- The **Edit** button will allow a highlighted event to be changed.
- The **Delete** button will remove a highlighted event.
- The **OK** button will accept changes and close the Event Schedule window.

Events can be added by selecting the **Add** button to launch the Schedule window.
Schedule Window

The Schedule window has several configuration settings.

**Event Type** is a drop-down box that allows event selection:

- **Disable Terminal** - This will prevent a terminal from being used, although its terminal server sessions will still be running on the terminal servers.
- **Enable Terminal** - This will allow a disabled terminal to become active again.
- **Reboot Terminal** - This will cycle power on the terminal and reload its configuration.
- **Reset Terminal Sessions** - This will logoff the sessions that the terminal has open on terminal servers.

The **Repeat Interval** radio buttons allow the event in the Event Type drop-down to be run **Once Only**, **Weekly/Daily**, **Monthly**, or **Yearly**.

- Selecting **Once Only** will show a **Select Date** field for the event.
- Selecting **Weekly/Daily** will show a **Weekly Schedule** list for the event to run. The **Every Day** button will select all the days in the list.
- Selecting **Monthly** will show a **Select Day of Month** field for the event.
- Selecting **Yearly** will show a **Select Date** field for the event.

The **Time** field allows the selection of the time that the event should occur.

Select the **OK** button to close the Schedule window.

Select **Add** to add another event to the Event Schedule or select **OK** to close the Event Schedule window and return to the terminal configuration.
